# SCA-Only in Katello 4.12

Jeremy Lenz  
jlenz@redhat.com  
@jeremylenz

FOREMAN

# Entitlement mode will be removed in Katello 4.12

- All organizations will be migrated to SCA during upgrade
- Toggling SCA will not be possible in Katello 4.12+

FOREMAN

# Simple Content Access refresher

- Katello no longer does subscription counting
- Subscriptions live *only* in the manifest now
- No attaching subscriptions to activation keys
- No attaching subscriptions to hosts
- Much simpler workflow for access to content

FOREMAN

# Simple Content Access refresher

How to give your hosts access to content - The Old Way

1. Disable custom repositories if needed
2. Enable RH repos if needed
3. Attach a subscription

FOREMAN

# Simple Content Access refresher

How to give your hosts access to content - The New Way

1. Enable custom repositories if needed
2. Enable RH repos if needed
- ~~3. Attach a subscription~~

# Little bits removed in 4.12

- SCA toggle checkbox on Organization Create & Edit screens
- Host statuses:
  - Subscription
  - Addons
  - Role
  - Usage
  - System purpose
- API endpoints related to toggling SCA
- Hammer commands related to toggling SCA

FOREMAN

# New(ish) features to make SCA easier

- OS and Arch restrictions for custom repositories
- Custom products are now disabled by default
- Subscription - General report enhanced (Foreman 3.11)
